## EDUCATION

---

### Drexel University

September 2017 - Present

*BSCS Computer Science and BS Mathematics, Pennoni Honors College*

GPA: 3.98/4

Current teaching assistant for CS265 - Advanced Programming Techniques

Co-founder and executive board member of Drexel Blockchain

Executive board member of Drexel Mathematics and Computer Science Society (MCS)

## TECHNICAL SKILLS

---

### Computer Languages

Java, Python, Javascript, C, C++, Bash, SQL, Go

### Software & Tools

ReactJS, AngularJS, NodeJS, MongoDB, Spring, Hibernate, Git

## EXPERIENCE

---

### ActivFix

December 2017 - Present

*Software Engineer*

- Developing an admin module for managing system's data and a payment module for receiving payments, speeding up the launch process by several months
- Deployed and currently managing an Ubuntu cloud server and Nginx proxy server
- Co-designed the architecture of the application and the MySQL database following scalability practices

### GovITHub

October 2016 - February 2017

*Software Engineer*

- Developed the frontend of a news distribution web application in ReactJS
- Wrote unit tests for different front-end behaviors and interactions in Jest
- Restructured ReactJS components to use static typing using Flow

## HONORS, AWARDS & CERTIFICATIONS

---

- Drexel University Founders Scholarship
- DevHacks 2016 Hackathon, sponsored by Microsoft, Teamnet, SoftVision - 2nd/ 52 teams
- JSHacks 2016 Hackathon, sponsored by Endava and VisionMobile - 1st/ 13 teams
- Junior Achievement Young Enterprise "Company of the Year" - national finalist
- Cisco Networking Academy IT Essentials Certification
- Certiport Digital Literacy Certification

## PROJECTS

---

### SpeedPlan

Event flyer scanning mobile app

- Designed the underlying architecture and structure of the app following MVC and DAO patterns
- Used specific libraries for camera, file system and external apps interaction and integrated Tesseract OCR
- Designed and implemented custom data parsing algorithms for splitting detected text into multiple fields

### Teens' Bucharest App

Mobile version of a local news web app

- Built three modules that facilitated full interaction with the app's content (news, Facebook events, podcasts)
- Customized a video content playing library to achieve better performance for audio only content and increased the app's podcast player's responsiveness by more than 300%
- Used technologies such as React Native, Redux for state management and Reselect for selector caching
